

CRAPAUD H3 REPORT

Run No.:	1789
Date:	28/4/24
Hare(s):	Vital Statistics

The early forecast for this Sunday's run was for rain, wind and yet more rain but the weather gods took pity on Vital Statistics and allowed the sun to shine for most of the day.

The venue this week was Les Laveurs carpark opposite Jersey Pearl with al fresco On Downs and food in the shelter besides the fallen pine trees.

A reduced pack of only 5 runners and an additional 7 walkers gathered for the usual instructions of lots of sawdust and chalk but with the proviso that probably not much of the said chalk would be there after the previous night's heavy rain. The running pack, which included Elli a returnee guest and one who was soon to put our hashers through their paces, and a returning Trotsky too were seen heading in a northerly direction along the sea wall whilst the walkers made their way to Chemin du Moulin, the lane immediately behind Jersey Pearl. From these two different directions both groups found the various pathways leading up to Grantez dolmen and through the surrounding lanes and tracks.

It was very much an uphill and down dale sort of run with lots of off road, which was very much appreciated by runners and walkers alike – as was the beautiful scenery, stunning views and ample flora and fauna.

The last part of the trail took in Les Mielles de Morville and then across to the seawall with views of a surfing tide. It was here that we came across Steptoe, who was out and about exercising not only his own two dogs but Jenny's too.

We were joined for the On Downs by Steptoe, Walkies, Tinky and Ragsby. A birthday drink was awarded to Trotsky, who thought she might have got away with it as her birthday was in March. Trotsky was joined in the limelight by Vital Stastics, who was given the usual down down awarded to the hare for not only a good and well-laid trail but for providing lovely picnic fare as well.

Thanks too to Wendolene for keeping the hashers on the right path.
