

# CRAPAUD H3 REPORT

<b>Run No:</b>	1900
<b>Date:</b>	14/6/26
<b>Hares(s):</b>	Hooker

SUNDAY 14 June 2026 was a landmark date – not a major one, but a landmark nevertheless. Yes, the Crapauds assembled at the Vic in the Valley for what was to be the 1,900th run in their long and illustrious history.

The runners and walkers who waited for GM Jacko and hare Hooker to issue the orders of the day might not have been uniformly righteous, but the sun shone on them anyway. It was a good day for hashing – at the relentless and punishing tempo set by stalwarts such as Frisco and Software or at the gentle ambling pace set by walker-in-chief Illegal.

Starting from the depths of the valley inevitably means that the trail involves some climbs, but there were few complaints, though as Steptoe's Strava record indicates there were clearly occasions when the precise nature of the route proved to be something of a mystery.

It was, meanwhile, good to see Beaver return to the fold for a gentle outing. Her hashing background is many years deep and she no doubt knows that she's always welcome to join the Sunday fun as often as she likes.

The on-downs were, of course, enjoyed at the Vic, which had enough real ale on tap to keep even the grumpiest of aged Hashers happy. There were also bacon rolls, which made a change from sausages and chips. However, Tinky managed to choose the comedy roll, which held only a single rasher of streaky. Never mind: he quickly put it back so that someone else could enjoy the joke.

When it came to the down-downs, Beaver was rewarded for turning up, Hooker was punished for setting a good trail and Jenny had to face the birthday ritual.

The star, however, was Frisco, who had sinned in a different setting. He was grassed up for having gone to the gym, only to realize that he had left his kit at home. Fortunately, Steptoe was also there, so Frisco borrowed some of his stuff, apparently unfazed that it had already been used and was still nicely damp from our former GM's exertions on treadmill and rowing machine. Hero or what?

*On-on!*
